Equality
Men / Women

On equal pay: Women are paid less than men for the same job and the same experience. That's why women have to work harder than men to get the same pay.

The same job: Some jobs are considered to be more "male" than others. For example, a male nurse is paid more than a female nurse. This is because men are considered to be better at the job. But women can do the same job as men and be paid the same.

The same impact in the politics: Men and women have the same impact in the politics. They can both be elected to the same office and have the same power.

Men and Women need: Men and women need each other. They are both part of the same human race and they both have the same rights and responsibilities.

Gender equality for a better world!
